Venu Karanam

PRODUCT MANAGER | TECHNICAL PRODUCT OWNER | DATA, ANALYTICS & AI PRODUCTS

Hyderabad, India | +91 6303117119 | karanamvenu4@gmail.com | LinkedIn | Portfolio

Professional Summary

Product Manager / Technical Product Owner with 4+ years of product experience across SaaS, Enterprise Analytics, FinTech, DevSecOps and AI-powered products. Currently owns product strategy, roadmap, OKRs, prioritization and delivery for Enterprise Reporting at Sonatype, supporting analytics and reporting across enterprise security products.

Experienced across the end-to-end product lifecycle: product discovery, customer needs, roadmap planning, prioritization, PRDs, requirements, Agile delivery, UAT, product analytics and release management. Partners with Engineering, Data Engineering, BI, Data Analytics, QA and business stakeholders to translate customer and business problems into scalable product solutions.

Delivered measurable impact through data and performance optimization, Generative AI, intelligent automation and enterprise analytics, including a 95% reduction in processing time, 45% reduction in data-processing costs and 85% reduction in support burden.

AI, Data & Tools: Generative AI | AI Product Development | Agentic AI | Databricks | Looker | Jira

Professional Experience

SONATYPE — Hyderabad, India

Technical Product Owner | Dec 2025 – Present

- Own product strategy, roadmap, OKRs, prioritization and delivery for Enterprise Reporting across Sonatype Lifecycle, Firewall and Nexus Repo.
- Drive the end-to-end product lifecycle, translating customer needs, business objectives and product analytics into roadmap initiatives, PRDs, requirements and measurable product outcomes.
- Partner with Engineering, Data Engineering, Data Analytics, Support and Documentation to deliver cross-functional initiatives and align technical execution with product goals.
- Led the UI and product redesign of Enterprise Reporting, improving customer experience while evaluating architecture changes and identifying 6 key risks across data consistency, access controls, fallback behavior and reconciliation.
- Led data pipeline and reporting workflow optimization using Databricks liquid clustering, achieving a 95% reduction in processing time and 45% reduction in data-processing costs while maintaining data quality and customer experience.
- Built an AI-powered dependency malware scanner using live threat intelligence; won the Hackers Choice Award at Sonatype Hackathon 2026.

FACTSET — Hyderabad, India | Jul 2022 – Dec 2025

Promoted from Senior Product Analyst to Associate Product Specialist, Mar 2024

Associate Product Specialist | Mar 2024 – Dec 2025

- Led end-to-end development of Generative AI solutions for internal and client-facing applications, translating business problems and user needs into AI-powered product capabilities.
- Partnered with clients, business stakeholders, Product, Engineering and QA across discovery, requirements, development, UAT, release and post-release feedback.
- Translated business requirements into PRDs, user stories, acceptance criteria and actionable development requirements, aligning product opportunities with business objectives.
- Identified opportunities for AI-powered automation and intelligent workflows and contributed to the development of a Fusion-based support portal.

Senior Product Analyst | Jul 2022 – Mar 2024

- Designed and deployed a custom chatbot to automate recurring user inquiries, reducing support burden by 85% and improving user experience.
- Used product analytics, user feedback and business requirements to identify product opportunities and recommend feature and usability improvements.
- Partnered with Engineering and QA across requirements, development, UAT, release validation and Agile/DevOps-enabled product delivery.
- Collaborated with clients to gather requirements and maintain product documentation.

LTTS — Mysore, India

Engineer Trainee | Jan 2022 – May 2022

- Worked across the Product Development Life Cycle (PDLC), from requirement gathering to deployment, in a fast-paced Agile environment.

Education

SRM Institute of Science and Technology
Bachelor of Technology (B.Tech), Electronics & Communication Engineering | Jun 2018 – May 2022

Certifications

- Certified Product Owner — BA-Squared, LLC
- McKinsey Forward Program — McKinsey & Company
- Atlassian Agile Project Management
- Salesforce Certified AI Associate
- Generative AI for Project Management — Google
