PROFESSIONAL EXPERIENCE

Technical Product Owner, Sonatype — Hyderabad, India

Dec 2025 – Present

- Own product strategy, roadmap, OKRs, prioritization and delivery for Enterprise Reporting across Sonatype Lifecycle, Firewall and Nexus Repo.
- Optimized data pipelines and reporting workflows using Databricks liquid clustering, achieving a 95% reduction in processing time and a 45% reduction in data-processing costs while maintaining data quality and customer experience.
- Led the UI and product redesign of Enterprise Reporting to improve customer experience; evaluated architecture changes and identified 6 key risks across data consistency, access controls, fallback behavior and reconciliation.
- Built an AI-powered dependency malware scanner using live threat intelligence; won the Hackers Choice Award at Sonatype Hackathon 2026.
- Translate customer needs, business objectives and product analytics into roadmap initiatives, PRDs and requirements; partner with Engineering, Data Engineering, Data Analytics, Support and Documentation to deliver cross-functional initiatives.

FactSet — Hyderabad, India

Jul 2022 – Dec 2025 (promoted from Senior Product Analyst to Associate Product Specialist, Mar 2024)

Associate Product Specialist | Mar 2024 – Dec 2025

- Led end-to-end development of Generative AI solutions for internal and client-facing applications, turning business problems and user needs into AI-powered product capabilities.
- Partnered with clients, Product, Engineering and QA across discovery, requirements, development, UAT, release and post-release feedback.
- Wrote PRDs, user stories and acceptance criteria that aligned product opportunities with business objectives.
- Identified AI-driven automation and intelligent workflow opportunities and contributed to a Fusion-based support portal.

Senior Product Analyst | Jul 2022 – Mar 2024

- Designed and deployed a custom chatbot that automated recurring user inquiries, reducing support burden by 85% and improving user experience.
- Used product analytics, user feedback and business requirements to identify opportunities and recommend feature and usability improvements.
- Partnered with Engineering and QA on requirements, development, UAT and release validation in an Agile/DevOps-enabled environment; gathered client requirements and maintained product documentation.

Engineer Trainee, LTTS — Mysore, India | Jan 2022 – May 2022

- Worked across the product development life cycle, from requirement gathering to deployment, in an Agile environment.

EDUCATION

B.Tech, Electronics & Communication Engineering — SRM Institute of Science and Technology | Jun 2018 – May 2022

CERTIFICATIONS

Certified Product Owner (BA-Squared) | Salesforce Certified AI Associate | Atlassian Agile Project Management | Generative AI for Project Management (Google) | McKinsey Forward Program
